

## Market Overview

The Tallahassee EdgeConneX Edge Data Center® (EDC) has been purpose-built and precisely located in order to provide a secure colocation facility for customers wishing to deliver content and applications to local-market consumers, with the lowest possible latency. Partnering with network and cable operators at the local level, our carrier neutral facility guarantees the shortest and fastest routes for delivering content to local market subscribers (consumer and enterprise) and Internet customers.

Tallahassee serves as the state capital of Florida and a metropolitan area of nearly 400,000 people at a convenient location from which much of the Southeast is accessible. Home to a swathe of state agencies and universities such as Florida State and Florida A&M, Tallahassee is an emerging data center market in a rapidly growing part of the United States.

## Campus Highlights

- **TAL01:** 250 kW N+1, scalable to 500 kW
- **TAL01:** Network diversity
- **TAL01:** Within 6 miles of downtown Tallahassee

## EdgeConneX Benefits

### Capacity

State of the art data center with the flexibility to support deployments ranging from a single rack, to a large custom cage or pod, all the way to a build to suit data center any of which can further scale to meet future needs for growth.

### Connectivity

Many leading NSP's and MSO's are deployed in our Tallahassee Data Center and available for interconnection.

### Capability

Purpose-built Tier-3 designed facilities with superior operating reliability, high-density power, and carrier-neutral support to satisfy any customers challenges and demands.

### Cloud

Multi-hybrid cloud solutions for enterprises can be supported through our technology and solution partners meaning customers can locally access leading CSP's from our Tallahassee Data Center.

### Customer Experience

EdgeOS DCIM platform allows remote monitoring and management of your workloads.

### Partners

Our world-class partners help EdgeConneX deliver the combination of solutions your business needs.

Tallahassee, FL 32303

## Technical Specifications & Configuration

### Space

11,810 sq ft facility  
3,778 sq ft of raised floor for tenant racks  
Within 6 miles of downtown TAL and 7 miles of Tallahassee Regional Airport  
Customer work space available  
WiFi network access and cell phone repeaters/boosters throughout the facility

### Power

250kW N+1; planned for 500kW  
Concurrently maintainable power in a minimum of an N+1 configuration includes: - PDU - UPS - Generators  
Capable of 20+kW per cabinet  
Capable of 600+ watts per sq ft  
Ghost space not required for cooling power dense installations  
Real-time branch circuit monitoring

### Cooling

The facility has robust and redundant power and cooling to support any application, where temperature and humidity is monitored, controlled and managed to industry standards  
30 inch raised/under floor forced air plenum  
N+1 CRACs located in separate suites, maximizing customer designated areas

### Security

Multi-stage security containment systems that use PIN and live video authentication  
Mantraps and strictly enforced protocols regarding entry access  
24/7 Color CCTV/video surveillance and >90-day online video storage  
Interior managed security zones  
National network operations center for security management  
24/7 NOC services

### Fire Suppression

Pre-action, zoned dry-pipe sprinkler systems with zoned maintenance aisles and separate suites

### Network

Building POEs are diverse, with a variety of fiber conduits to physically diverse MMR's  
CloudFlare, Comcast, Lumen, Uniti, WhiteSky Interconnection services available

### Optional Services

Remote hands services for break fixes, configuration, and troubleshooting  
EdgeConneX Services: design, build, implement, and maintain your equipment infrastructure  
EdgeOS, our next generation data center operating system provides real-time visibility, including ticketing and SLA management for all EDC locations

### Standards and Certifications

The TAL01 data center is SOC 2 Type 21, ISO 27001 and PCI DSS compliant.
